

Sea water property changes in the Southern ocean

Juan Botella
Monona Grove High School

Dr. Jim Swift
Scripps Institution of Oceanography

I am holding a bottle for Carbon 14 while standing next to the rosette

Niskin bottle seen from above

Lanyards web keep the bottles open during deployment

Rosette deployment

Sampling the rosette

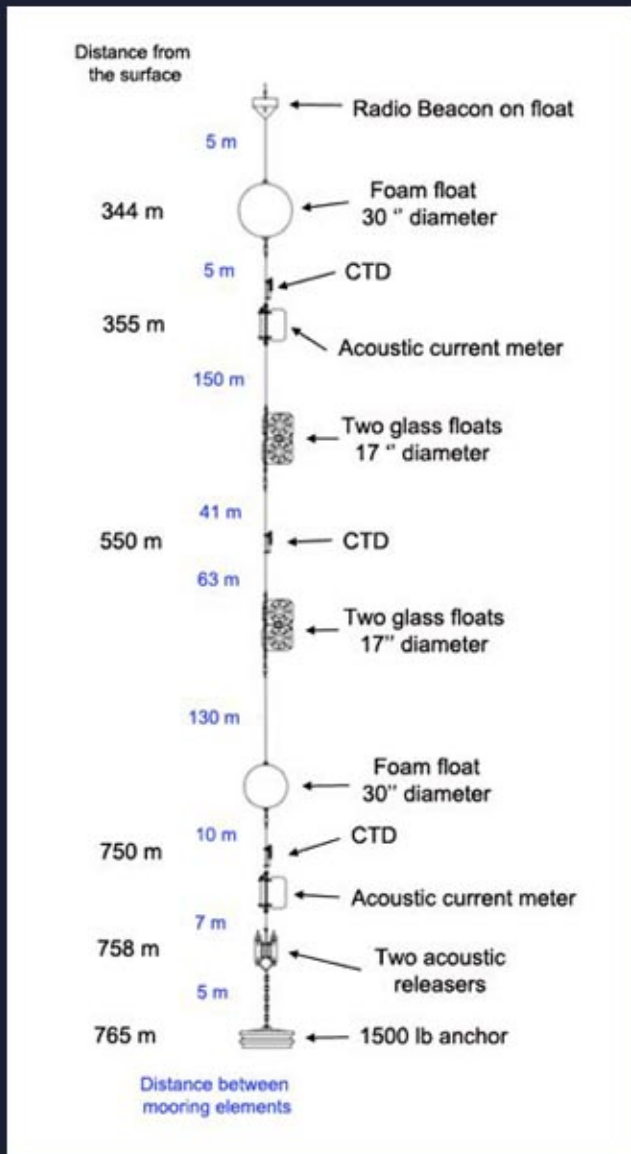

Strange looking machine for analyzing CFCs

Fragil environment changing by global warming

Mooring diagram

Mooring recovery

McMurdo Station's airport

My cabin with four bunkbeds

Two hour recess in nine weeks

Skua

Crabeater seals that floated our way

Humpback whales

Adélie penguins at McMurdo Station

Two Adélie penguins

An Emperor penguin on stage

Iceberg at sunset

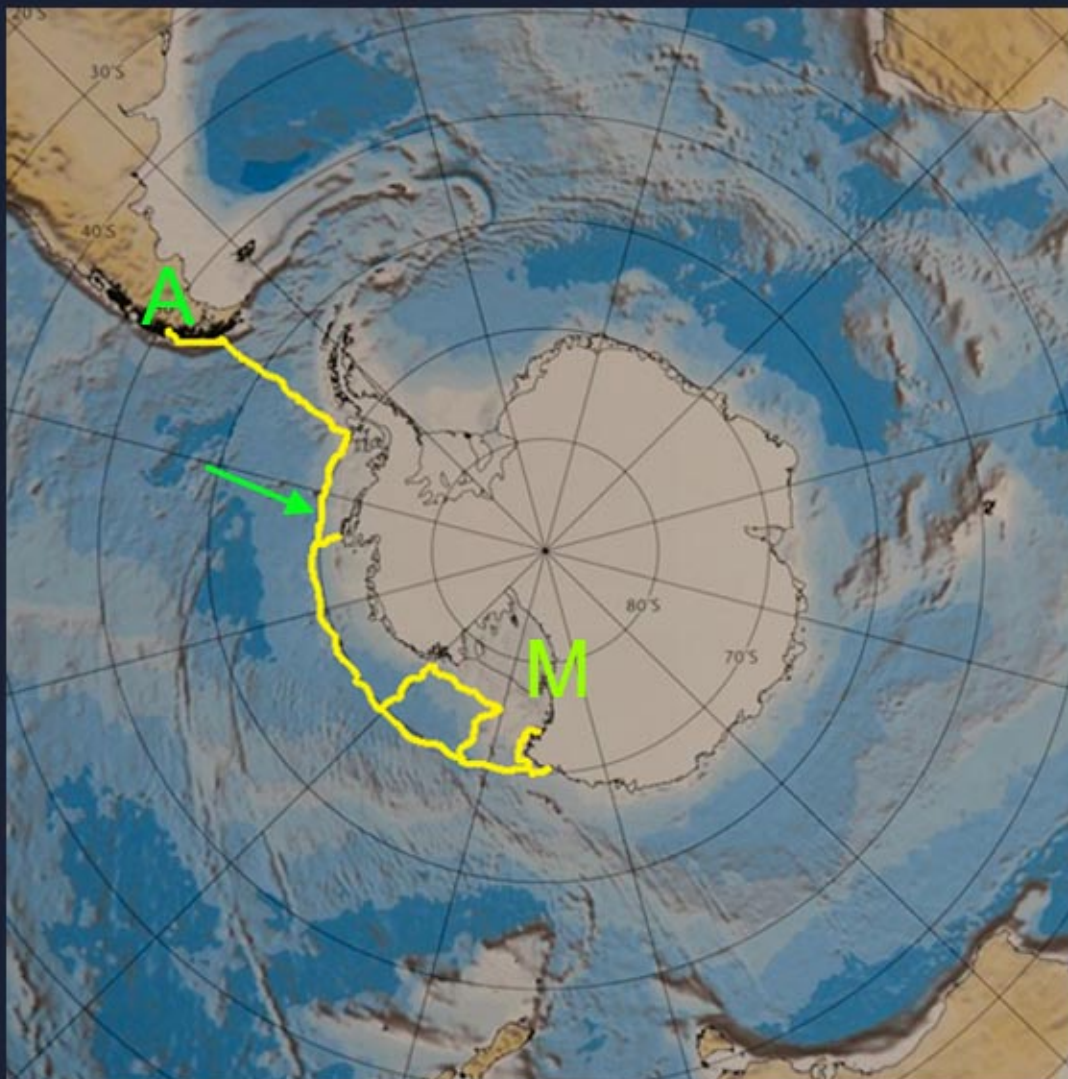

Perigee moon

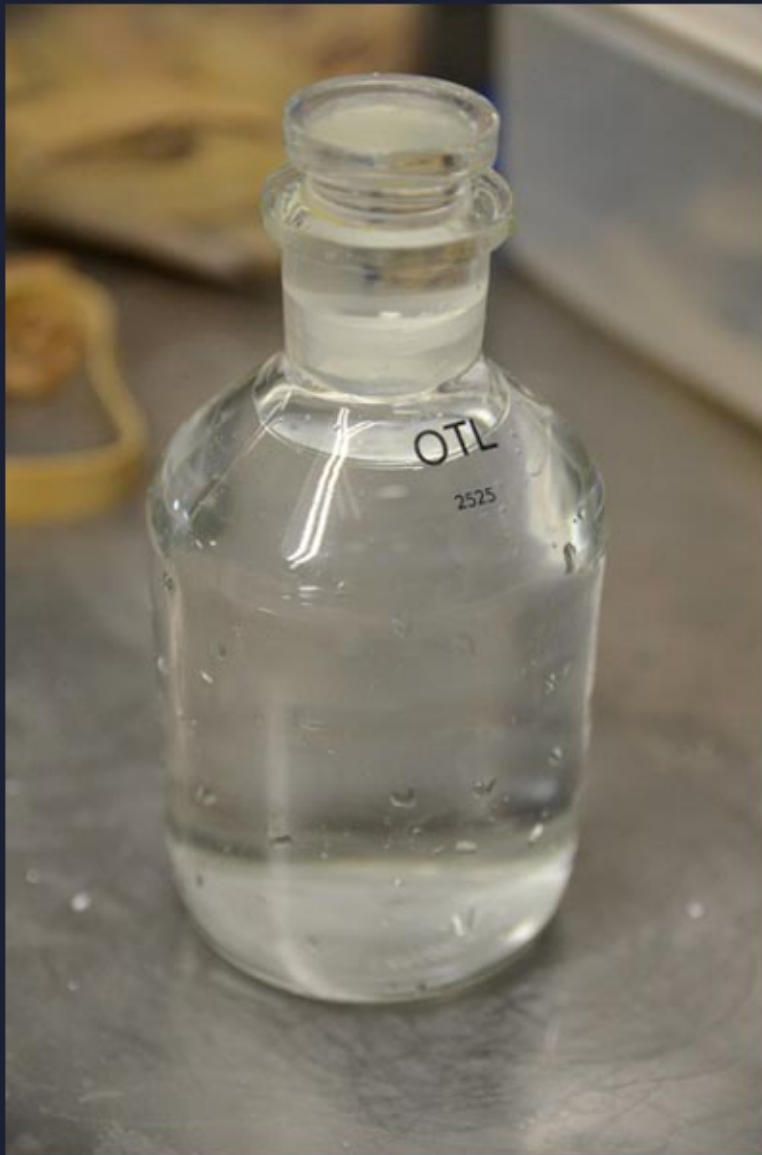

Aurora australis over the Southern Corss constellation

Steam ahead to solve the puzzle

Ship trajectory for 65 days at sea

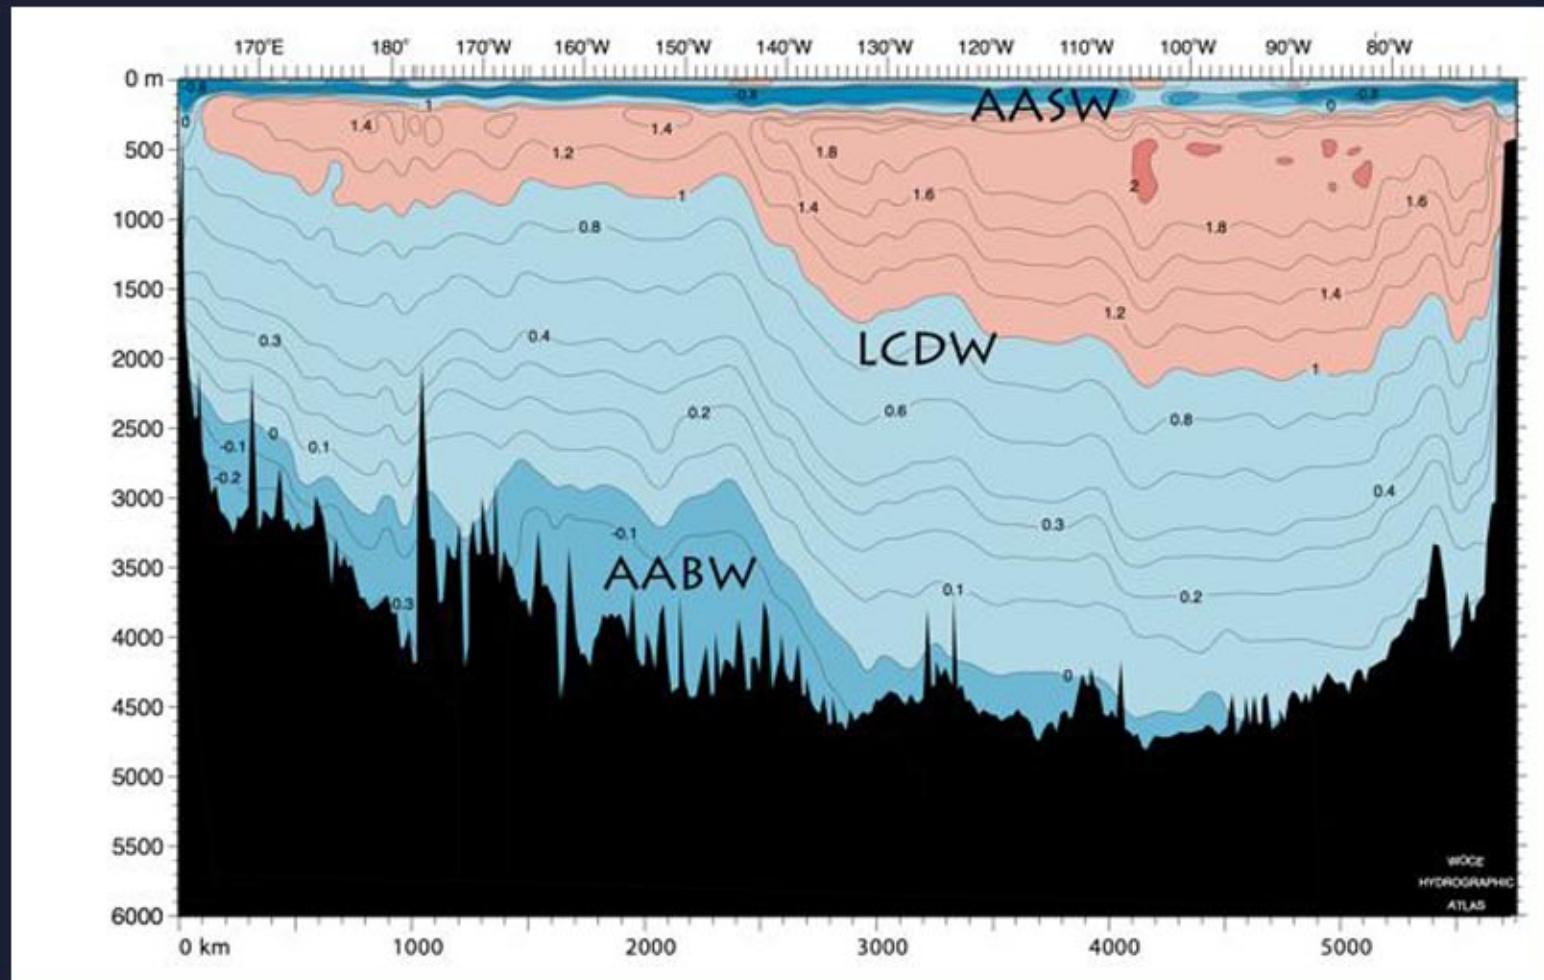

We traveled far to get this,
water at different depths
of the Southern Seas

Vertical profile of a cake

Sampling stations on a cake

Vertical slice of the ocean showing the temperature distribution
