

What the Warming Future Holds for Our Alaskan Animals: Tea Party Questions

1. Find an animal whose habitat may shrink due to climate change. What is the habitat? Can it live somewhere else?
2. Find a person or animal whose habitat may expand or get bigger due to climate change? What is the habitat? Will he/she/it take some other animal's habitat?
3. Find an animal whose food source may shrink due to climate change. What is that food source? Does that animal have a way to adapt?
4. Find an animal whose young may survive at higher rates due to warmer climates. Describe the reasons why more young will survive.
5. Find an animal that is struggling because of human-designed efforts to decrease climate change. Explain this relationship.
6. Find an animal that may go extinct. Why might this animal go extinct?
7. Find a human who is concerned about climate change? Why is s/he concerned?
8. Find a human who sees a benefit to climate change. What is the benefit? Will all humans experience the benefit? Who benefits?
